About This Game

Meet Margot, the video game queen of word play. Margot has devised a set of fiendish wordbased puzzles to test your vocabulary, spelling and general language skills. No two games will ever be the same as you pit your wits against the clock to create words from randomly generated letters in order to maximise your score.

Features

- Six different word puzzles to tackle: Word Link, Word Mine, Hyper Text, Word Race, Word Safe and Word Search. All of these games present a unique challenge and players will have to master them all to become the ultimate Word Brain.
- Word Brain mode pits the player against all six of the games in succession and records their score so that they can track their progression throughout the game.
- Easy to use menus and gameplay make Margot's Word Brain a game that is accessible to gamers of all ages and experience levels.

Title: Margot's Word Brain

Timers (with time not changeable - the game has no options) combined with slightly laggy mouse input (including mouse movement - needed to move to other letters), make this game - which can't be resized - and which has no difficulties to choose from, fairly unplayable & very unfulfilling.

Also uses some VERY obscure words - Maguey and Drupes, anyone?
(I feel this would be okay in the hardest difficulty setting, if it had them - but not in the default/only difficulty)

Unless the game gets updated with timer settings & difficulty added,
Avoid!
